WORK EXPERIENCE

Junior Developer (Internship) - BH Inc. Apr 2026 – Sept 2026

- Developed and maintained full-stack internal web applications for two distinct construction divisions, owning the software development lifecycle from requirements elicitation and UI/UX design to implementation and deployment for one of them.
- Built dynamic user interfaces using React, TypeScript (TSX), and SCSS, backed by Flask REST APIs and PostgreSQL databases.
- Utilized version control and established GitHub CI/CD pipelines to manage code collaboration, streamline deployment workflows, and ensure quality standards through pull requests and code reviews. .
- Identified and resolved production bugs, optimized UI/UX elements for visual polish and responsiveness, and provided ongoing maintenance and support for existing applications.

IT Support Specialist- BH Inc. Nov 2025 - Sept 2025

- Delivered bilingual technical assistance in English and Spanish, resolving inquiries related to account administration, construction-specific software, and network connectivity for desktop and mobile environments using remote services and MDM software.
- Developed standardized inventory management protocols for \$1M in equipment, driving improved asset control and security across the entire organization.
- Reduced mobile line bill by 10% from several carriers accounts (Verizon, AT&T, T-Mobile) with 500+ lines by sorting through data and identifying key usage patterns.
- Trained new employees, while also contributing in building a more structured training program as well as other projects to improve and organize our workload more effectively.
